Golf Me to the Moon

Platform: PC / Smartphone
Target age: 12-30 years

GAME SUMMARY

Hey! You've just landed on an unexplored planet and your mission is to recon its surface to determine its potential for a mining colonization.

Launch on your Hillhopper to avoid the toxic gas that has settled around the planet's geological formations and travel as far as you can before your fuel runs out. Make us proud.

GAME OUTLINE

Jump from one mountain top to another by aiming and calculating the impulse needed for the perfect parabole.

If you land on the center of the plateau, your next launch's maximum possible impulse will be far greater than if you land on the edge. Falling is punishing on your resources, but you can pick up power-ups to catch up.

USP

-Launch from platform to platform
-Avoid falling
-More accurate landings mean more powerful shots
-Consume power-ups
